# HVO (Hydrotreated Vegetable Oil)

## Fuel your new diesel Škoda with HVO and reduce emissions by up to 90%

### What is HVO?

HVO is a fuel replacement or alternative for compatible diesel engines. HVO offers a cleaner way to fuel by providing up to 90% reduced CO2 emissions. Unlike first generation biofuels, which are made from crops such as rapeseed and soy, Hydrotreated Vegetable Oil (HVO) is a second-generation biofuel made from pre-existing bio-waste products, primarily used cooking and vegetable oil from food industry waste. Manufactured from renewable and sustainable waste, HVO is a paraffinic drop-in fuel designed as a direct replacement for diesel. It meets the international fuel standard EN 15940. HVO can provide full lifecycle greenhouse gas (GHG) emission savings of up to 90% when compared to conventional diesel fuel.

### What are the benefits?

**Sustainability** – Made from sustainable and renewable raw materials, HVO reduces carbon emissions by as much as 90%. This enables households and businesses to make an immediate reduction in carbon emissions and reduce their environmental impact.

**Improved Air Quality** due to a reduction in particle and nitrogen oxide (Nox) emissions compared to diesel

**Performance** – Your vehicles performance will be indistinguishable from diesel with the fuel performing better under certain circumstances such as cold winter conditions

**Direct Drop-In** – No modifications are required to new Škoda's in order to use HVO. HVO and diesel fuel can be interchanged and mixed in any ratio or concentration.

**Price** – currently many fuel suppliers in Ireland are providing HVO at a comparable or equivalent price to diesel. So there is no additional cost to switching

### Where can I get HVO for my Škoda?

HVO is already available at selected Certia and Circle-K outlets in Dublin, Tipperary, Carlow, Cork and Donegal with availability improving all the time.

### How do I know if my Škoda is compatible with HVO?

Only Škoda vehicles from “Model Year 2022” (not registration in 2022) are compatible with HVO. You can identify if your Škoda is HVO compatible by the lettering “XTL” detailed inside the fuel filler flap. If you are unsure of your vehicles model year please contact your Škoda Dealer. Biodiesel or vegetable oil should not be used in Škoda vehicles and these products should not be confused with HVO. Only HVO that meets standard EN 15940 should be used in Škoda vehicles.
